

Cefla will attend 2021 Ecomondo – Key Energy expo with its Business Unit Engineering

Cefla once again joins the 2021 Ecomondo – Key Energy expo that will take place from the 26th to 29th October 2021 at the Rimini Fiera, after the 2020 shut down due to COVID-19.

Through its Engineering Business Unit, Cefla has been working for almost 90 years to design, build, and manage technological systems in the industrial, construction and energy sectors. Thanks to these efforts, Cefla has improved the quality and comfort of the places where people live, work and spend their leisure time.

The Engineering BU has also been involved in the energy industry for almost 40 years designing, building and managing cogeneration and trigeneration, heat recycling and gas flow scrubbing plants, as well as the large district heating plants that supply heat and light to hundreds of thousands of people.

Beyond offering their expertise in the Cogeneration field, the Engineering Business Unit also works closely to the Customer during the full energy set up process (especially with new factories).

Working together with the final customer, the Engineering BU of Cefla can provide: design of the energy system, system engineering, construction and maintenance of the entire plant.

The organizational structure of the Engineering BU provides an integrated service that includes:

- Feasibility study
- Basic design, engineering and technological design
- Plant construction and maintenance

Last but not least, the innovative Global Service Business Line, focused on outsourced operations, maintenance, and facility management of industrial and high-tech production systems, infrastructures and building of historic and artistic importance.

“Despite 2020 has been a difficult year, even tragic for many businesses, our balance sheet maintained a strong performance. This is a great source of pride for us and a drive to do better and achieve more and more. Additionally, taking part of the Ecomondo Expo gives us the possibility to present many important topics and news, one above all, the acquisition of the German company Plant Engineering GmbH, which is specialized in the engineering and design of cogeneration and biomass plants”, said **Massimo Milani, Managing Director Cefla Engineering.**

Meet again at Ecomondo, from 26th to 29th October will be the opportunity to play an active role in an era of great changes in the Energy business world.

On **BOOTH 021, HALL B5D5**, you will be able to meet the Sales and Technical Team of Cefla and have the chance to reciprocally exchange contacts and skills.
